Ripsy Technologies Inc.
Attn: Hiring Manager

Dear Hiring Manager:

I share Ripsy Technologies passion for making the world a happier and healthier place, as someone who is married to a healthcare worker I hope to help make their lives easier in any way that I can, which is why I'm applying for the Full Stack Developer opening. My experience in JavaScript, Node, React and PostgreSQL speaks to the qualifications of this role. I believe that my combined skills and background in Full Stack Development would allow me to be a valuable member of your team and start contributing immediately.

I've recently completed Thinkful's Full Stack Engineering program where I studied JavaScript, Node, React, PostgreSQL, HTML5, and then applied those skills by building frontend and backend projects. From a flashcard app that allowed teachers to create flash cards for their students to help learn the material. To a movie database that would give users access to data about movies, theaters, and reviews.

In addition to those skills, I believe that my experience as a Membership Associate at Costco gives me an extra edge when it comes to being self-directed with an ownership mindset, since dealing with members taught me how to be resourceful and pay keen attention to details. Whether it was a sign up or if that member had a much bigger issue, I was there to help them in any way that I can to make sure that they had the most impactful experience and to create members for life.

I look forward to speaking with you further about my qualifications. You can contact me at (425) 429-5303 or email me at noahjohnson22@gmail.com Thank you for your time and consideration.

Sincerely,

Noah Johnson
